

Woodland management

Woodland management ensures that our woods are worked and cared for in a way that helps provide us with many benefits, while making sure they stay healthy and continue to thrive in the future.

Recreation and learning

walking, jogging, playing,
learning, forest schools

Landscape and scenery

landscape character, scenery,
sense of place, viewpoints

History and heritage

old landmarks, ancient
woodlands, boundary markers

Wildlife

habitats and homes, birds,
butterflies, fungi, insects,
mammals, moths, plants

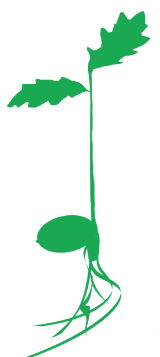

Natural systems

clean air and water, flood
protection, carbon storage,
woodland ponds, plant associations

Woods for the future

helping people and nature
adapt to a changing climate,
protecting trees from disease
