

## Wildlife Ways Update - Issue 4

---

Welcome to the Wildlife Ways Stay Connected bulletin, giving you all the latest news about this exciting three-year programme.

---

### Castle Bromwich (Route I) Works to Start

May sees Wildlife Ways returning to Castle Bromwich, where Bradford Road and Hall Road will see further works lasting approximately a month.

Works as part of the scheme will include a new zebra crossing and relocation of two street lamps on Hall Road, two new cycleway sections at the junction with Bradford Road, cycle lanes along Hall Road between Chester Road and Bradford Road, and changes to road markings.

There will also be a new signal head for cyclists exiting the park by Hall Road/Bradford Road. This will provide guidance and safety for cyclists at a section where they may have different needs from other road users.

You can see more details, including pedestrian and traffic diversion maps, at the Wildlife Ways website [here](#).

In March the project saw wildflower planting in this area (*pictured above*) which is now starting to bloom.

---

## Ward Updates

### Elmdon

In June we will be starting work in Elmdon Park and along Damson Parkway on Route B. More details will be announced shortly. Keep visiting the Wildlife Ways website [here](#) for updates.

Work is coming to an end on Route A between Lode Lane and Elmdon Park, by the side of Jaguar Land Rover. A section of the route (*pictured above*) has already re-opened and the rest is due to be completed in early June. Some bulb planting will take place along the route in the autumn.

### St Alphege

At the end of this month work on widening footpaths on Monkspath Hall Road is due to be completed. It is to be followed in the autumn of this year by planting and landscape improvements including bulbs, wildflowers and some trees.

---

## About Wildlife Ways

Wildlife Ways is a £16.8 million programme – part-funded by the European Regional Development Fund (ERDF) – to improve the borough for the benefit of people and wildlife alike. The programme will include tree, bulb and wildflower planting. It will also make it easier for people wanting to walk and cycle across the

borough by widening and connecting paths and cycle routes with green spaces.
